

Direct Drive High Pressure Pump

This pump features stainless steel plungers and a fixed rate chemical injector. It also has a built-in self suction unloader and an in-line water inlet filter.

Overview

High-Performance Direct Drive Pump

The 3WZ-2525A is a robust high-pressure direct drive pump engineered for demanding industrial cleaning applications and pressure washer systems. Featuring a durable brass manifold, this unit is designed to withstand harsh environments while delivering consistent performance. Its compact design and standard connection points ensure seamless integration into existing equipment setups.
