

Dishwasher and Sanitizing Appliance

This appliance combines dishwashing and disinfection in one unit. It ensures dishes are thoroughly cleaned and sanitized with multiple wash cycles, temperature settings, and a UV light or ozone disinfection cycle.

Overview

Dual-Function Cleaning & Sanitization

This compact dishwasher and disinfection apparatus is engineered for efficient household use, combining high-performance dishwashing with advanced sanitization. It features a space-saving design suitable for smaller kitchens while offering multiple wash cycles and temperature controls. The integrated disinfection cycle utilizes UV light or ozone technology to effectively eliminate bacteria and viruses, ensuring a hygienic clean for your dinnerware.
