

Disposable Pulp Kidney Dish

Molded pulp kidney dish designed for single use and disposal. Constructed from recycled paper pulp, it offers an environmentally friendly alternative to plastic or metal.

Product Overview

Sustainable Medical Solutions

This disposable kidney dish is crafted from high-quality recycled paper pulp, providing a reliable and eco-friendly alternative to traditional plastic or metal medical trays. Designed for single-use applications, it ensures optimal hygiene standards while reducing the need for sterilization processes. The robust construction features a reinforced rim for spill containment, making it a versatile tool for medical, dental, and laboratory environments.

Technical Specifications

Usage Type

Single-use • Disposable

Key Features

- Smooth interior surface
- Reinforced rim
- Spill containment design

Material

Recycled paper pulp

Applications

Suitable For

Medical, Dental, Laboratory
