

Domestic Water Pressure Booster Pump with Integrated Filter

This compact water pump features an integrated pressure tank, ideal for domestic water supply and irrigation. It is equipped with a transparent filter and corrosion-resistant brass fittings.

Product Overview

Compact Pressure Solution

This domestic water pressure booster pump is engineered to optimize water supply and irrigation efficiency in residential environments. Featuring an integrated pressure tank and a built-in filter, it provides a seamless solution for maintaining consistent water flow. The unit is constructed with durable components, including brass fittings, to ensure long-term reliability and corrosion resistance.

Technical Specifications

Construction Materials

- Brass connectors
- Blue-painted motor housing
- Transparent filter bowl
- Spherical red pressure tank

Key Features

Integrated Pressure Tank, Built-in Filter, Corrosion Resistant Fittings, Compact Design

Applications

Best For

- Domestic water supply boosting
- Small-scale irrigation systems
