

Dot Matrix Printer for Continuous Forms

This dot matrix printer is designed for continuous forms and multi-part printing. It features a wide carriage, high-speed printing, and a durable print head for reliable performance in demanding environments.

Product Overview

Robust Printing Solution for Continuous Forms

This dot matrix printer is engineered specifically for reliable high-volume printing of continuous forms and multi-part documents. It features a wide carriage and a high-speed print head designed to withstand demanding industrial and office environments. With flexible paper handling and legacy connectivity, it remains a dependable solution for diverse documentation needs.
