

DOT3 Brake Fluid

High-performance DOT3 brake fluid is engineered for superior braking performance in heavy-duty applications. This fluid exceeds specifications, conforms to safety standards, and provides reliable braking power for a wide range of vehicles.

Product Overview

High-Performance Brake Fluid

This DOT3 brake fluid is engineered for superior performance in heavy-duty braking applications. It is formulated to exceed industry specifications and strictly conforms to international safety standards, ensuring reliable and consistent braking power. Suitable for a wide range of vehicles, this fluid provides the essential safety and durability required for professional automotive maintenance.

Technical Specifications

Fluid Classification	DOT3
Standards Conformance	J1703, 116-0073, Safety Standard Compliant
Net Volume	250 ml

Performance Features

Application Suitability

- Heavy-duty applications
- General automotive braking systems
- Vehicles requiring DOT3 standard

Performance Highlights

1 High

Reliability

1 Certified

Safety Standard
