

Double Eye Leaf Spring

This leaf spring features a double-eye design for secure mounting and is constructed from high-strength steel for durability. It provides reliable suspension support and improves ride quality in trucks, trailers, and other heavy-duty vehicles.

Overview

High-Strength Suspension Solution

This double eye leaf spring is engineered for reliable suspension support in trailers and RVs. Constructed from high-strength steel, it features a multi-leaf design that effectively distributes load to provide progressive stiffness and improved ride quality. The double eye ends are equipped with bushings to ensure smooth, quiet operation during heavy-duty use.

Technical Specifications

Design Type	Double Eye Leaf Spring
Material	High-strength steel
Compatible Vehicles	Trailers, RVs, Heavy-duty vehicles

Features

Key Features

- Multi-leaf design for progressive stiffness
- Double eye ends with bushings
- Load-bearing construction
- Quiet and smooth operation
