

Double Face Brass Hammer

This double-faced brass hammer provides a softer striking surface compared to steel, reducing workpiece damage. The tool is available in multiple sizes, ranging from 500g to 5000g, and features a wooden handle for a secure grip.

Product Overview

Professional Double Face Brass Hammer

This double-face brass hammer is engineered for applications where non-sparking and non-marring impact is essential. The brass head offers a softer striking surface than steel, significantly reducing the risk of damage to delicate workpieces. Equipped with a sturdy wooden handle, this tool ensures a comfortable and secure grip for professional use.

Key Features
