

Double-Faced LED Safety Warning Light

This double-faced warning light provides high visibility to enhance safety and awareness. The light features a circular red lens and a sturdy base for stable placement.

Product Overview

High-Visibility Safety Lighting

This double-faced LED warning light is engineered for maximum visibility and reliability in demanding environments. Featuring a powerful 7W LED source with a 100,000-hour lifespan, it ensures long-term performance. With a visual distance of 1500 meters and an IP65 protection rating, it is built to withstand harsh conditions while providing essential safety signaling.

Technical Specifications

Protection Grade

IP65

Light Source

LED 7W (100,000h lifespan)

Visual Distance

1500 m
