Product Overview

Professional Grade Electric Kettle

This double-layer electric kettle is engineered for efficiency and safety in any professional or modern kitchen environment. Featuring a high-quality stainless steel interior paired with a durable exterior, it provides superior thermal insulation and a cool-touch surface. With rapid boiling capabilities, automatic shut-off, and boil-dry protection, this appliance combines user convenience with essential safety features for daily operation.

Technical Specifications

Power Output

1500 W
Power

Voltage & Frequency

220-240V, 50/60Hz

Design & Construction

Construction

Double-layer, Stainless steel interior, Cool-touch exterior

Base Design

360-degree swivel base, detachable

Safety & Features

Safety Mechanisms

- Automatic shut-off
- Boil-dry protection
- Concealed heating element
- Secure lid mechanism

Usability

Rapid boiling • Visible water level • Drip-free spout • Removable filter
