

Double Needle Lockstitch Sewing Machine with Split Needle Bar

This double needle flatbed lockstitch sewing machine features a split needle bar. It is ideal for apparel and textile manufacturing, offering robust construction and advanced control systems for efficient and high-quality sewing operations.

Overview

Professional Double Needle Lockstitch Machine

This double needle flatbed lockstitch sewing machine is engineered for high-efficiency apparel and textile manufacturing. Featuring a specialized split needle bar mechanism, it allows for independent needle movement, which is essential for creating precise, intricate, and decorative stitching patterns. The robust flatbed design provides a stable, spacious work surface suitable for a wide variety of fabric types and sizes.

Technical Specifications

Machine Type	Double Needle Flatbed Lockstitch
Special Mechanism	Split Needle Bar
Model Number	TY-B845-403

Features

Operational Benefits

- User-friendly programming interface
- Independent needle movement
- Stable flatbed work surface
- Robust construction for industrial use

Stitching Capabilities

Lockstitch, Decorative Stitching, Intricate Patterns

Safety

Safety Compliance

Eye Safety Required • Special Safety Device Equipped
