

Double-Wheel Soil Tillage Machine with Plow

The double-wheel soil tillage machine is designed for efficient soil preparation in agricultural settings. Equipped with a plow attachment, it enhances functionality for deeper soil turning and improved seedbed preparation.

Overview

Robust Soil Tillage Solution

The 1Z-20 is a powerful double-wheel soil tillage machine engineered for efficient soil preparation in agricultural settings. Featuring durable tines and adjustable depth control, it adapts seamlessly to various soil conditions. The included plow attachment allows for deep soil turning, making it an essential, cost-effective tool for small to medium-sized farms.

Technical Specifications

Model Number	1Z-20
Design Type	Double-wheel
Primary Functions	Plowing, Tilling, Soil Cultivation, Seedbed Preparation

Features

Key Features

- Powerful engine for optimal performance
- Durable tines for thorough cultivation
- Adjustable depth control
- Included plow attachment
- Double-wheel design for stability and maneuverability

Application

Suitable For

Small Farms • Medium-sized Farms • Agricultural Soil Preparation
