

Double Wire Drawing Machine for Medium Gauge Wire

This double wire drawing machine is engineered for the precise and efficient drawing of medium-sized wires. Its heavy-duty construction incorporates multiple drawing dies and capstans, ensuring consistent wire diameter and smooth operation.

Overview

High-Efficiency Double Wire Drawing

This double wire drawing machine is engineered for medium gauge wire processing, offering high production efficiency and stable, reliable performance. Designed for precision, it supports dual-line output to maximize throughput while maintaining consistent wire quality. The system is equipped with an advanced Siemens PLC and touch screen interface for intuitive control and operational ease.

Technical Specifications

Production Size Range (Dual Line)	0.15 - 1.20 mm
Production Size Range (Single Line Max)	2.76 mm
Material Compatibility	Copper

Control System

Control System
Siemens PLC • Touch Screen
