

Drill Bit Re-Sharpener

This drill bit re-sharpener is a portable machine designed for accuracy and durability. It can sharpen the tip, front cutting edge, chip flute, and center chisel edge, while also facilitating precise positioning and easier chip removal for enhanced drilling.

Product Overview

Precision Drill Bit Maintenance

The TX-Z13 portable drill bit re-sharpener is designed to restore cutting edges with professional accuracy. Engineered for durability, it utilizes high-quality drilling components to ensure long-term reliability in demanding workshop environments. This machine streamlines maintenance by allowing precise adjustment of the tip, front cutting edge, and chip flute, ultimately extending the lifespan of your tooling inventory.

Technical Features

Sharpening Functions

- Tip (top) sharpening
- Front cutting edge grinding
- Chip flute (rear) maintenance
- Adjustable center chisel edge

Compliance and Safety	CE, Manual Required
Component Origin	Taiwan-made drilling wheels
