

Drilling and Milling Machine

This drilling and milling machine is a versatile tool for metalworking. It features a robust construction with a precision milling table and vertically adjustable head.

Overview

Versatile Precision Machining

This drilling and milling machine is a robust solution designed for diverse metalworking applications. It features a precision milling table with manual handwheel controls for accurate X and Y axis positioning, alongside a vertically adjustable head. Equipped with an integrated coolant system and a comprehensive set of standard accessories, it provides a reliable platform for professional drilling and milling tasks.

Standard Accessories

Standard Equipment

- Drill chuck 16mm
- Cutter 80mm
- Taper sleeve
- Arbor
- Drift
- Wrench
- Drawbar

Optional Upgrades

Special Accessories

- Milling chuck
- Angle vice
- Safety guard
- Stand

Technical Features

Axis Movement

X-Axis Handwheel • Y-Axis Handwheel • Vertical Head Adjustment

Coolant System

Yes

Control Panel

Integrated panel with buttons and switches for operational control
