Overview

High-Performance Drilling Mud Pump

This industrial-grade mud pump is engineered for demanding drilling operations, offering compatibility with F1000, F800, and F500 models. The system features a robust power end with forced and splash lubrication, alongside a high-efficiency fluid end designed for excellent suction and compression resistance. It includes comprehensive cooling and lubrication systems to ensure longevity and consistent performance in the field.

Technical Specifications

Compatible Liner Sizes

- 6"
- 5"
- 5 1/2"
- 4"

Physical Dimensions

4180 mm

Length

3162 mm

Width

2260 mm

Height

Compatible Models

F1000, F800, F500

Power End Features

Core Components

- Frame
- Crank shaft
- Pinion shaft
- Crosshead
- Extension rod

Lubrication System

Combination of forced lubrication and splash lubrication

Fluid End Features

Cylinder Material

Forged alloy steel

Anti-Corrosion Treatment

Yes

Cylinder Interchangeability

Three cylinders are interchangeable

Auxiliary Systems

Spray System Purpose

Cooling and lubrication for liners and pistons to prolong lifetime

Charging Pump

Yes
