

Drop Forged 12-Point Combination Wrench

This combination wrench is drop forged and available in sizes from 22mm to 150mm. The wrench is constructed from high hardness, corrosion resistant steel.

Overview

Professional Grade Combination Wrench

This drop-forged 12-point combination wrench is engineered for tightening and loosening large bolts and nuts in demanding environments. Featuring both a closed box end and an open end for versatile engagement, the spline design accommodates numerous fastener head types. Its durable construction and black finish ensure reliable performance for automotive, industrial, and general maintenance tasks.
