

Drywall Screws

These screws are designed for fastening drywall to studs. They are available in black phosphate and silver finishes.

Product Overview

Professional Grade Drywall Screws

These drywall screws are engineered for secure and efficient fastening of drywall panels to wood or metal studs. Featuring sharp, piercing points and coarse threads, they provide excellent holding power and quick installation. The countersinking head design ensures a flush finish, creating a smooth surface ready for finishing and painting.

Technical Specifications

Fastener Type	Drywall Screw
Head Style	Countersinking

Finishes and Coatings

Available Finishes

Black Phosphate • Zinc Plated

Coating Benefits

- Phosphate coating provides corrosion resistance
- Zinc plating offers protective finish
- Designed for durability in drywall applications
