

Dual 12-inch Stage Speaker System with Equalizer

This stage speaker system delivers high-power audio performance. It features dual 12-inch woofers, an equalizer, and supports USB/SD card playback, FM, and karaoke functions.

Product Overview

Professional Stage Audio Performance

This dual 12-inch stage speaker system is engineered for high-fidelity audio reproduction and professional-grade performance. Featuring a multi-functional control panel with built-in equalization, it offers versatile playback options including USB and SD card support. The system is designed to deliver a wide frequency response and powerful bass, making it an ideal solution for various demanding audio applications.

Performance Metrics

Peak Power Output

9500 W
PMPO

Audio Capabilities

Hi-Fi Audio, High-Power Output, Equalizer Control, Professional Stage Ready

Connectivity & Inputs

Supported Media Inputs

- USB Drive
- SD Card
- Microphone Input

Placement & Setup

Speaker Placement Recommendations

Component	Placement Tip
Ultra Low Bass Box	Best placed on the ground; keep 5-10cm from wall for bass reinforcement.
Rear Speakers	Align with user axis; keep height flush with ears; maintain distance under 1.5m.
