

Dual Channel VHF Wireless Microphone System

This VHF wireless microphone system ensures clear and reliable audio transmission. It includes a receiver and two handheld microphones operating on separate VHF channels to minimize interference.

Product Overview

Professional Wireless Audio

The PV-2518 is a reliable dual-channel VHF wireless microphone system engineered for clear sound transmission in professional settings. This system features dual handheld microphones and an advanced receiver, making it an excellent solution for public speaking, presentations, and live performances. With a stable operating range of over 50 meters, it offers flexibility and consistent performance for various event environments.

Technical Specifications

Performance Metrics

210 MHz

Frequency Range Start

270 MHz

Frequency Range End

50 m

Operating Distance

85 dB

Signal to Noise Ratio

Audio Standards

Parameter	Value
Frequency Response	40Hz - 20kHz
Frequency Stability	$\pm 0.005\%$
Max Deviation	$\pm 30\text{kHz}$
T.H.D	$<0.2\%$
Dynamic Range	$>80\text{dB}$

System Configuration

Key Features

Dual Channel, FM Modulation, High Fidelity, Individual Volume Control

Power and Compatibility

Power Input

AC220V
