

Dual Channel VHF Wireless Microphone System

This wireless microphone system features dual handheld microphones and a receiver base. The system includes individual volume controls and signal level indicators, with quartz synthesized frequency for stable transmission.

Product Overview

Professional Wireless Audio Performance

The dual channel VHF wireless microphone system provides a reliable and stable audio solution for professional environments. Featuring quartz-synthesized frequency transmission, the system ensures consistent signal clarity and minimal interference. With independent volume controls for each microphone and integrated signal level indicators, users can achieve precise audio monitoring and adjustment.

Technical Specifications

Transmission Technology	VHF
Frequency Control	Quartz Synthesized
Channels	2

Features

Control Interface

- Individual Volume Controls (VOL1, VOL2)
- Power Switch
- Independent Channel Monitoring

Monitoring Indicators

Multipath Level Display, Signal Level Indicators, Audio Level Metering
