

Dual Head Pick and Shovel Tool

This heavy-duty digging tool has a dual-ended design. One end features a pointed pick for breaking up hard soil, while the other has a flat blade for scooping and moving material.

Product Overview

Dual-Head Digging Versatility

This heavy-duty dual-head tool combines a pointed pick for breaking through hardened soil and rocky terrain with a flat blade designed for efficient scooping and material movement. Engineered from high-strength steel, it provides exceptional durability for demanding tasks in landscaping and construction. Its bright red finish ensures high visibility on busy job sites, and the universal eye design accommodates standard-sized wooden handles.

Technical Specifications

Dimensions and Weight Matrix

Size (mm)	Eye (up/down mm)	Weight (lbs)
530x37	55/65	4.5
540x40	55/65	5
