

Dual Light Guide Cold Light Source

This cold light source with double light guides provides intense, focused illumination without the heat associated with traditional light sources. It is ideal for microscopy, inspection, and precision assembly tasks where thermal sensitivity is a concern.

Product Overview

Dual Light Guide Cold Light Source

This cold light source with double light guides provides intense, focused illumination without the heat associated with traditional light sources. It is ideal for microscopy, inspection, and precision assembly tasks where thermal sensitivity is a concern. The unit features a durable housing and is designed for continuous use in demanding environments.

Technical Specifications

Main Power	220/120VAC 60HZ
Maximum Temperature	3200 K
Bulb Specification	21V 150W Halogen Bulb (#5902)
Bulb Life	100 Hours
Output Port Diameter	5/8 inch
Fuse	2 A

Physical Attributes

Weight	8 LB
Package Dimensions	38 x 26 x 21 cm
Key Features	Cold Light, Dual Guide, Continuous Use, Durable Housing
