

Dual-Material Head Hammer with Ergonomic Grip

This hammer features a dual-material head, combining a rubber top with a textured body. Its red handle provides a comfortable and secure grip.

Overview

Versatile Precision Tool

This dual-material head hammer is engineered for versatility and precision in professional and DIY applications. The unique head design combines a specialized rubber top with a textured body to ensure effective force application while protecting delicate surfaces. Designed with an ergonomic handle, it reduces user fatigue during extended periods of use, making it an essential addition to any toolkit.

Design & Build

Head Material	Rubber, Textured Composite
Handle Grip	Ergonomic

Performance

Primary Use

Precision Work • Surface Protection
