

Dual-Piston Vacuum Pump

This vacuum pump features a dual-piston design. It is equipped with rubber feet for stability and vibration dampening.

Product Overview

Industrial Dual-Piston Vacuum Pump

This dual-piston vacuum pump is designed for high-performance industrial and laboratory applications requiring reliable suction. Featuring a robust construction with a dual-cylinder configuration connected by a central rod, it ensures consistent operation and durability. The unit includes integrated rubber feet for enhanced stability and effective vibration dampening, making it suitable for sensitive environments.

Technical Features

Build Quality

Metallic finish • Robust design

Design Type

Dual-piston

Mounting

Rubber feet, Vibration dampening
