

Dual RG6U Coaxial Cable

Dual RG6U coaxial cable ensures reliable signal transmission with its braided shielding and central conductor. It is designed for applications requiring two separate coaxial connections, including satellite TV, cable TV, and broadband internet.

Product Overview

Dual RG6U Coaxial Cable

The Dual RG6U Coaxial Cable is engineered for high-performance signal transmission in residential and commercial environments. This cable features a robust white outer jacket and advanced braided shielding to ensure protection against interference, maintaining signal integrity. Designed to accommodate two separate connections in a single run, it is the ideal solution for satellite TV, cable TV, and broadband internet installations.
