

Dual Stage Rotary Vane Vacuum Pump

This vacuum pump is designed for efficient, reliable, and low-noise operation. It is popular for applications in refrigeration, medicine, chemical processing, and metallurgy.

Overview

Dual Stage Rotary Vane Vacuum Pump

This high-performance dual-stage rotary vane vacuum pump is engineered for efficient evacuation in HVAC&R applications. Built for professional use, it delivers reliable vacuum levels required for maintaining system integrity and optimal performance. Its robust construction ensures long-term durability in demanding service environments.

Performance Metrics

Rated Speed

2880 rpm

Rotation Speed

Ultimate Vacuum

1.5 microns (0.2 Pa)

Technical Specifications

Power Ratings

200W, 210W, 330W, 380W, 390W, 400W

Physical Dimensions

Size and Weight Specifications

Dimensions (mm)	Weight (lb/kg)	Oil Capacity (oz/ml)
330x135x255	19.2 / 8.7	12.3 / 350
350x145x265	23.3 / 10.6	14.8 / 420
350x143x265	26.0 / 11.8	14.8 / 420
380x160x285	31.9 / 14.5	22.9 / 650
380x160x285	32.6 / 14.8	21.5 / 610
380x160x285	33.5 / 15.2	20.8 / 590
