

Ductile Iron Foundation Piles

Ductile iron piles are designed for creating stable foundations in various soil conditions. Their construction ensures durability and efficient installation for demanding petrochemical and construction projects.

Product Overview

Ductile Iron Foundation Piles

These ductile iron foundation piles are engineered for high-performance use in demanding construction and engineering environments, including petroleum prospecting. Designed for durability and efficient installation, they feature consistent diameter and uniform construction to ensure reliable performance across various soil conditions. Their robust build and corrosion-resistant surface finish make them suitable for long-term underground applications.

Technical Specifications

Standard Lengths

- 6 meters
- 8.15 meters

Diameter Range

DN80 - DN2600 mm

Quality & Compliance

Certifications

ISO 9001, ISO 14001, GB/T 28001, BV Certified, KS Certified

Manufacturing Capabilities

Annual Production Capacity

38000 km

Pipeline Production
