

# Dustproof Safety Mask with Exhalation Valve

This dustproof safety mask provides a barrier against airborne particles. Its contoured design ensures a comfortable fit, while the exhalation valve enhances breathability.

## ADDITIONAL IMAGES

## Product Overview

### Professional Dust Protection

This anti-dust safety mask is designed to provide a comfortable and effective barrier against airborne particles such as dust and pollen. Featuring a built-in exhalation valve, the mask facilitates easier breathing by reducing heat and moisture buildup during extended use. Its contoured design and soft material ensure a secure fit for various applications including construction, woodworking, and general maintenance tasks.

## Technical Details

Material	Sponge
Key Features	Exhalation Valve, Contoured Fit, Elastic Ear Loops, Breathable

## Logistics & Packaging

Packaging	OPP bag
