

DVI Digital Video Splitter 1 In to 8 Out

This DVI digital video splitter distributes a single DVI input signal to 8 identical DVI output signals. It supports high-resolution video with minimal signal degradation, suitable for simultaneous display across multiple screens.

Product Overview

Professional DVI Signal Distribution

This high-performance DVI digital video splitter is designed to distribute a single DVI input signal to eight identical outputs. It ensures high-quality signal integrity by providing direct distribution without amplification, attenuation, or distortion. It is an ideal solution for digital TV production lines, shopping malls, and exhibition environments where simultaneous, high-resolution playback is required.
