

Dynamo and Solar Powered LED Lantern

This eco-friendly lantern features a dynamo-powered mechanism, removing the need for batteries. It is also equipped with a solar panel for alternative charging.

Product Overview

Sustainable Illumination

This versatile lantern offers a reliable, eco-friendly lighting solution designed for both outdoor adventures and emergency preparedness. By integrating both dynamo-powered mechanisms and solar charging capabilities, it eliminates the dependency on disposable batteries. Its robust construction ensures durability in demanding environments, providing consistent illumination whenever needed.

Power & Charging

Charging Methods	Dynamo, Solar
Battery Free	Yes

Features

Primary Applications

- Camping
- Emergency Preparedness
- General Outdoor Use

Key Attributes

Eco-friendly • Durable Construction • Sustainable
