

Earth Leakage Circuit Breaker

Earth leakage circuit breaker designed to protect electrical circuits from ground faults. This device is engineered for reliable performance and safety, interrupting the circuit when a leakage current is detected.

Overview

Reliable Earth Leakage Protection

This Earth Leakage Circuit Breaker is engineered to provide essential protection for electrical circuits against ground faults. Designed for both industrial and residential environments, the device automatically interrupts the circuit when leakage current is detected, ensuring safety and preventing equipment damage. It features an integrated test button for routine functionality verification, making it a dependable choice for critical electrical safety applications.

Technical Specifications

Rated Voltage	400 V
Rated Current	63 A
Rated Residual Operating Current (I _n)	0.03 A
Short Circuit Capacity	6000 A

Features

Suitable Applications

- Industrial Electrical Systems
- Residential Circuit Protection

Key Features

Ground Fault Protection, Manual Test Button, Circuit Interruption
