

Earth Leakage Circuit Breaker

This earth leakage circuit breaker provides protection against earth faults. It has adjustable current and time settings and a compact design for easy installation.

Product Overview

Industrial Earth Leakage Protection

This high-sensitivity earth leakage circuit breaker is engineered for demanding industrial applications where safety is paramount. It provides robust protection against earth faults, effectively preventing both electrical shocks to personnel and potential damage to critical equipment. The unit features a compact, space-saving design that integrates easily into standard electrical panels while offering adjustable settings for precise control.

Technical Specifications

Rated Current	40 A
Leakage Sensitivity	0.03 A
Device Type	Earth Leakage Circuit Breaker

Key Features

Protection Capabilities	Earth Fault Protection, Shock Prevention, Equipment Damage Prevention
Adjustable Settings	Yes
Installation	Compact design suitable for electrical panel mounting
