

Earthmoving Bulldozer

This bulldozer is designed for earthmoving, construction, and mining applications. It features a robust undercarriage and durable blade for efficient material handling.

Overview

High-Performance Earthmoving Solution

The SD16 is a robust bulldozer engineered for demanding earthmoving, construction, and mining applications. It features an advanced hydraulic drive system and hydraulic control technology, ensuring reliable performance across various terrains. Designed with operator comfort and efficiency in mind, this machine offers convenient and flexible operation to maximize productivity on the job site.

Technical Specifications

Drive System	Hydraulic drive system
Control Technology	Advanced hydraulic control

Key Features

- Machine Highlights**
- Powerful engine
 - Robust undercarriage
 - Durable blade
 - Comfortable operator cabin
 - Advanced control systems

Suitable Applications	Earthmoving, Construction, Mining
-----------------------	-----------------------------------
