

Educational Speaker with Screen and Control Panel

This is a portable educational device with a built-in speaker, screen, and control panel. It is designed for educational purposes and is likely intended for use by children.

Product Overview

Educational Interactive Speaker

This portable educational device is designed to facilitate interactive learning through a combination of audio and visual elements. Featuring a built-in speaker, a clear screen for graphical content, and an intuitive control panel, it serves as a versatile tool for classroom or home learning environments. The ergonomic handle and durable plastic construction make it easy for children to carry and use independently.
