

Educational Training Lathe

This high-precision teaching lathe is designed for educational and training purposes. It features a robust construction, user-friendly interface, and comprehensive safety features.

Product Overview

Educational Training Lathe

This high-precision lathe is specifically engineered for educational and training environments, offering a robust construction suitable for demonstrating foundational machining principles. The unit features a user-friendly interface combined with comprehensive safety protocols to ensure a controlled learning experience. Equipped with a digital display for accurate measurement and control, it provides students with professional-grade feedback across a variety of machining operations and materials.

Technical Specifications

Model Identifier	CK6130
Key Features	High-Precision, Educational Grade, Digital Display, Robust Construction
Safety Compliance	Yes
