

Efficient Self-Priming Water Pump

This self-priming pump is designed for efficient water transfer and pressure boosting. It features a robust motor, durable pump housing and self-priming capability for reliable operation in various applications.

Overview

High-Efficiency Self-Priming Water Pump

This self-priming water pump is engineered for superior reliability in water transfer and pressure boosting tasks. Its robust design features a durable housing and a high-performance motor, ensuring long-term operation in both domestic and irrigation environments. With its automatic self-priming capability, it provides consistent performance, making it an ideal solution for various general-purpose pumping requirements.

Technical Performance

Key Performance Indicators

1 Active

Self-Priming Capability

Suitable Applications

Domestic Water Supply, Irrigation, Pressure Boosting, General-Purpose Pumping

Quality & Standards

Compliance

Made in China
