Product Overview

Precision Ejector Pin Punch Set

This professional-grade ejector pin punch set is engineered for demanding industrial applications, including mold making and die casting. Manufactured from high-quality, hardened and tempered tool steel, these components offer exceptional durability, wear resistance, and long-term reliability. The set includes a comprehensive range of cylindrical and flat-ended punches, ensuring precise performance across various ejector pin diameters and tooling configurations.

Technical Specifications

Included Components

- Standard Ejector Pins
- Shouldered Ejector Pins
- Cylindrical Punches
- Flat-ended Punches
- Stepped Pins
- Bushings

Surface Finish

Wear Resistant • Precision Machined

Material Composition

Hardened Tool Steel, Tempered Steel

Application

Primary Applications

- Mold Making
- Die Casting
- Precision Manufacturing
