

Electric Anchor Windlass for Marine Applications

This electric anchor windlass is designed for 50/52/54 chains. It offers a working load of 106.3/114.9/123.9KN and a supporting load of 617/664/713KN.

Overview

Robust Marine Anchor Windlass

This heavy-duty electric anchor windlass is engineered for reliable performance in demanding marine environments. Designed for versatility and durability, it supports anchor chain diameters ranging from 50mm to 54mm. The unit features integrated warping heads to facilitate efficient mooring operations, ensuring ease of use and long-term operational reliability for commercial vessels.
