

Electric Aspirator Blower for Dust Removal

This aspirator blower is designed for efficient dust and debris removal. Its powerful motor provides strong suction and blowing capabilities for various cleaning applications.

Product Overview

High-Performance Dust Removal

This electric aspirator blower is engineered for efficient dust and debris removal in demanding environments like workshops, garages, and for maintaining electronic equipment. Featuring a powerful 425W motor, it delivers impressive suction and blowing capabilities to handle a variety of cleaning tasks. The ergonomic design ensures comfortable handling, while its durable construction is built for long-lasting, reliable performance.

Technical Specifications

Rated Power	425 W
No-load Speed	13000 rpm
Max. Blowing Rate	2.3 m3/min

Electrical Requirements

Voltage	110V / 220-240V
Frequency	50/60Hz

Certifications

Approvals	CE, FCC
