

Electric Bike Sealed Lead-Acid Battery 12V 10Ah

This is a sealed lead-acid battery designed for electric bicycles and other electric appliances. The 12V battery features a 10Ah capacity at a 2-hour discharge rate.

Overview

Reliable Power for Electric Mobility

This sealed lead-acid battery is specifically engineered to meet the demanding power requirements of electric bicycles and similar electric appliances. Designed for consistent performance, it provides a stable 12V output and a 10Ah capacity, ensuring reliable operation for daily commuting and transport needs. The maintenance-free construction offers peace of mind and long-lasting durability for various electric vehicle applications.

Technical Specifications

Nominal Voltage	12 V
Capacity	10 Ah
Discharge Rate	2-hour discharge

Features

Battery Technology

Sealed Lead-Acid • Maintenance-Free

Ideal Applications

Electric Bicycles, Electric Appliances, Electric Vehicles
