

Electric Cable Hoist - 1000kg Capacity

This single-phase electric hoist is suitable for use in diverse locations. It is particularly well-suited for lifting heavy goods in factories, workshops, homes, and warehouses, and can lift items up to 1000kg.

Overview

Reliable Lifting Performance

This 220V electric hoist is designed for efficient, safe load management in workshops, garages, and construction sites. Featuring an automatic braking system and double limit protection, it ensures secure operation for heavy lifting tasks. The unit offers flexible configurations for both single and double line usage to suit various lifting requirements.
