

Electric Chainsaw Sharpener

This compact electric chainsaw sharpener is designed for precise chain sharpening. It features an adjustable grinding angle, depth control, a transparent safety shield, a high-speed grinding wheel, and a robust clamping mechanism.

Product Overview

Precision Sharpening Solution

The JIM-KW-100 is a compact electric chainsaw sharpener engineered for precise and efficient chain maintenance. It features adjustable grinding angles and depth control to accommodate various chain sizes, ensuring optimal cutting performance. Built with a robust clamping mechanism and a high-speed grinding wheel, this tool is suitable for both professional workshop environments and home maintenance tasks.

Technical Specifications

Adjustment Capabilities

- Adjustable grinding angle
- Depth control

Model Number	JIM-KW-100
Safety Features	Transparent Safety Shield, Robust Clamping Mechanism
