

Electric Citrus Juice Extractor with Pulp Control

This electric citrus juicer efficiently extracts juice from various citrus fruits. It features a pulp control setting and a clear container.

Overview

Efficient Citrus Extraction

This electric citrus juice extractor is designed for high-performance juicing, featuring a 500W motor for fast squeezing. It includes a 1.4L container to handle both pulp and juice, making it a robust solution for fresh citrus preparation. With a removable stainless steel filter and adjustable pulp control, it offers both ease of cleaning and customized juice consistency.

Technical Specifications
