

Electric Coffee Maker with Integrated Burr Grinder

This electric coffee maker combines grinding and brewing into one appliance. It features a built-in burr grinder, grind size selection, and multiple brewing modes for customized coffee preparation.

Product Overview

Integrated Grinding and Brewing

This electric coffee maker combines a high-performance metallic flat burr grinder with a precision brewing system, ensuring the freshest possible cup of coffee by grinding beans immediately before brewing. Designed for versatility, it offers multiple operating modes including a ground coffee option and adjustable cup sizes. With convenient features like a removable filter system and a non-stick keep-warm plate, it provides a seamless and efficient coffee-making experience.
