

Electric Commuter Bicycle with Step-Through Frame

This electric bicycle is ideal for urban commuting and recreational use. It features a step-through frame, front basket, and rear rack for carrying cargo.

Overview

Efficient Urban Commuting

This electric commuter bicycle features a convenient step-through frame design tailored for daily urban travel. Equipped with a 350W brushless hub motor and a reliable lead-acid battery, it offers a practical range of 25-60km per charge. The inclusion of a front basket and comfortable saddle ensures a smooth, functional ride for city environments.
