

Electric Concrete Poker Vibrator

This electric concrete vibrator consolidates freshly poured concrete. It removes entrapped air and excess water from the concrete mix, resulting in a denser, stronger, and more durable concrete structure.

Product Overview

Professional Concrete Consolidation

This electric concrete poker vibrator is engineered to consolidate freshly poured concrete efficiently. By removing entrapped air and excess water, it ensures a denser, stronger, and more durable concrete structure. Its flexible shaft design allows operators to maneuver easily in tight spaces and around obstructions, making it suitable for foundations, walls, columns, and slabs.

Technical Specifications

Design Features

- Flexible shaft for reach
- Vibrating poker head
- Internal rotating eccentric weight

Power Source	Electric
