

Electric Diesel Fuel Pump for Agricultural Machinery

This electric diesel fuel pump is engineered to provide a consistent fuel supply for diesel engines. It offers an extended service life, solving cold start problems and eliminating the need for manual exhaust.

Product Overview

High-Performance Diesel Fuel Delivery

This electric diesel fuel pump is engineered specifically for agricultural machinery, including tractors and heavy-duty equipment. It features a robust cylindrical metal body designed to provide a consistent and reliable fuel supply to diesel engines under demanding field conditions. The unit comes complete with essential mounting hardware, including a rubber-lined clamp and an isolator bracket, ensuring stable installation and vibration reduction.

Technical Specifications

Included Components

- Electric diesel pump unit
- Rubber-lined mounting clamp
- Rubber isolator
- Metal mounting bracket
- Fuel line fittings

Hose Specifications

EN853 2SN-06 • DN06

Pump Type

Electric Diesel Fuel Pump

Suitable Applications

Agricultural Machinery, Tractors, Diesel Engines
