

Electric Diesel Fuel Pump for Construction Machinery

Electric diesel fuel pump designed for use in construction machinery. It enhances diesel engine performance and solves cold start issues.

Overview

Reliable Fuel Delivery Solution

This electric diesel fuel pump is engineered specifically for heavy-duty construction machinery, including excavators. It provides a robust solution for fuel system maintenance, ensuring consistent performance and reliability under demanding operating conditions. The kit comes complete with essential mounting hardware for a straightforward installation process.

Technical Details

Included Components

- Electric diesel pump
- Mounting bolts
- Washers
- Rubber bushings
- Sleeves

Reference Numbers	KS82C, ULPK0040, 386-0189
Primary Application	Construction Machinery / Excavators
Markings	4651 627851
