

Electric Diesel Fuel Pump for Freight Vehicles

This electric diesel pump is engineered to provide a long service life in diesel applications, up to 10000 hours. It addresses cold start issues in winter and removes the need for manual exhaust for diesel engines.

Product Overview

High-Performance Diesel Fuel Delivery

This electric diesel fuel pump is engineered specifically for freight vehicles, ensuring reliable and efficient fuel delivery. Featuring a robust cylindrical aluminum housing and a precision-engineered inlet/outlet assembly, it is built to withstand the demands of heavy-duty diesel engine applications. The design incorporates a black plastic mounting flange for secure installation and optimized performance.

Technical Specifications

Inlet Diameter	8 mm
Pump Type	Electric Diesel Fuel Pump
Model Identifier	KS52B 2641A203

Design & Construction

Housing Material	Aluminum
Key Features	Cylindrical Housing, Brass Inlet/Outlet, Plastic Mounting Flange
